

Service

Our mechanics are specialized in winch repairs. You can send us your winch or bring it to our workshop in Wesel.

For cost prediction of a winch repair, the winch must be dismantled and cleaned. The winch parts are checked and tested. This labor which also prepares the winch for the repair, will be invoiced (per hour 70.00 Euro + VAT), even if you will not decide to have the winch repaired.

The final invoice can differ from the cost prediction by 10 per cent.

For cost prediction, we ask for your order in writing. You may use a hardcopy of this .pdf:

Order for repair cost prediction of the following winch:

model	series number	defect
date	company address	signature
